Office Action Summary	Application No. 10/585,092	Applicant(s) OSAKA ET AL.	
	Examiner MATTHEW GORDON	Art Unit 2892	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claim 25: A device wherein in the substrate, the terminal for external connection is at a periphery of the substrate and the terminal for testing is at an inner portion of the substrate.

Claim 26: A device wherein in the substrate, the terminal for external connection is at a periphery of facing two sides of the substrate, and the arrangement area of the terminal for testing is arranged at a periphery of another facing two sides of the substrate.

Claim 27: A device wherein in the substrate, the area of the terminal for external connection is arranged at a periphery of the substrate, the arrangement area of the terminal for a test is arranged at an inner portion which adjoins the periphery of the substrate, and a non-terminal area where a terminal is not arranged is formed in a central part of the substrate.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 2892

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Applicant is also further required to elect one of the following species as well:

Claim 33: A device wherein the molded member has two different thicknesses wherein the thinner portion is arranged in a portion corresponding to the area of the terminal for external connection.

Claim 34: A device wherein the substrate extends beyond the periphery of the molded member and the terminal for external connection is arranged at the periphery of the substrate.

Claim 36: A device wherein the molded member is formed with fixed thickness and is formed so that a rim end portion of the substrate may be wrapped in.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Finally, applicant must also elect one of the following species:

Claim 30: A device (as shown in Fig. 6) wherein a spacer is exposed from the molded member over a front surface of the chip.

Claim 39: A device (as shown in Fig. 10) wherein the package has two or more packages stacked in layers.

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 25, 26, 27, 33, 34, 36, 30 and 39 in that order.

The following claim(s) are generic: 20 and 38.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The claims recite different arrangements of the various terminal areas and different molded packaging arrangements that are mutually exclusive.
